Projects

Sarthi Travel [Live Demo Link](#) [Github Repo Link](#)

HTML CSS JavaScript Bootstrap

JSON Server

- Developed an online platform for hotel and adventure trip bookings
- Implemented user login and registration functionality for secure user accounts
- Ensured website responsiveness for optimal user experience on various devices
- Implemented CRUD operations for booking and reservation management
- Contributed to a collaborative project completed by a 4-member team in just 5 days

Fast Fashion [Live Demo Link](#) [Github Repo Link](#)

React Redux JavaScript Tailwind

- Contributed to the development of an online e-commerce platform called Fast Fashion
- Implemented a well-organized and visually appealing product catalogue with filters and categories
- Assisted in creating the cart page and implemented cart functionality
- Implemented fetching of data from the fake store API
- Implemented Redux store to centralize data
- Collaborated with a 4-member team to complete the project within a tight 5-day timeframe

Comfort [Live Demo Link](#) [Github Repo Link](#)

HTML CSS JavaScript

- Developed a premium furniture e-commerce website using HTML, CSS, and JavaScript.
- Implemented category sorting feature for easy navigation and browsing of furniture items.
- Created a price filtering functionality to help users find furniture within their desired price range.
- Designed and implemented an efficient search feature allowing users to quickly locate specific furniture items.
- Developed the project individually, demonstrating strong problem-solving and independent working skills.
